Certamente la creazione di presentazioni resta una delle modalità più comuni di utilizzo delle tecnologie digitali in classe.

Purtroppo ancora troppi colleghi si limitano ad utilizzare programmi come PowerPoint, a pagamento e residenti nel pc.  Fortunatamente sono disponibili una gran quantità di siti web ed apps                                                                                                         che, oltre a consentire la creazione di splendide presentazioni, risultano molto semplici da usare.

Qui di seguito ecco un elenco di strumenti di presentazione raccolti da  Technology Tidbits: Thoughts of a Cyber Hero
, alcuni dei quali sono già stati recensiti nel mio blog.

1.      9Slides  - A wonderful site and app for adding video/audio narration to a presentation. Ideal for professional development or teaching a lesson.
2.      Animoto  - One of the most popular sites/apps for creating beautiful looking slideshows w/ an educational portal.
3.      AuthorStream  - A great way to upload PPT presentations and share them w/ others similar to Slideshare.
4.      Aximedia Slideshow Creator  - A wonderful Android app for creating stunning looking slideshows.
5.      Biteslide  - A fantastic site for creating interactive presentations that contain all types of media w/ educational portal, where teachers create student accounts.
6.      Electric Slide  - Is a nice iOS app that allows users to present all styles of presentations (PPT, Keynote, etc) wirelessly.
7.      eMaze  - A nice site that is a cross between Prezi and PP that allows users to zoom

around their presentation.  Best of all, a finished presentation can be embedded into a site.

8.      Flixtime  - A cool site for mixing photos, videos, and music to create a stunning presentation.

9.      Haiku Deck  - A amazing iPad app for creating beautiful looking presentations w/ the ability to upload Creative Commons licensed photos as well as creating charts and graphs.

10.      HelloSlide  - A innovative site that allows a user to add narration to their presentations simply by typing in text.

11.      Kizoa  - A fun site for creating slideshows or collages w/ a built in photo editor.

12.      Knovio  - A nice site for adding video or audio to a powerpoint presentation.  Ideal for Pecha Kucha style presentations.

13.      Magisto  - A cool way to create a presentation w/ this video mash-up site/app.

14.      Muvee Cloud  - Another nice video mash-up site that creates fun looking movies/presentations by mixing and matching video and music.

15.      Narrable  - An innovative site for adding audio to photos to create an engaging slideshow.

16.      Netclick  - While Netclick is more of a &quot;student response system&quot; it is a great way to engage an audience through the use of an interactive slideshow.

17.      One True Media  - A fantastic video mash-up site for mixing video, audio, and images to creating stunning presentations.

18.      PhotoPeach  - One of my favorite sites/apps for creating an interactive slideshow w/ educational portal.  A user can also create a quiz embedded into a slideshow as well.

19.      Photoshow  (Roxio) - A nice site for creating slideshows w/ photos, videos, and music, and sharing publicly or privately.

20.      PhotoSnack  - A fun site for creating slideshows for blogs, FB, or Twitter.

21.      Popcorn Maker  - One of the easiest video mash-ups sites around to creating stunning presentations.

22.      PowToon  - Is a new (beta) and wonderful site for creating amazing animated slideshows/presentations.

23.      Present.me  - A great site for &quot;flipping&quot; your classroom by adding a video narration side by side to a slideshow.

24.      Reel  - A simple site for uploading presentations to garner feedback and self assessment.

25.      Slide.ly  - Create a beautiful looking presentation w/ images and music.

26.      Slideful  - A fun site for creating beautiful looking slideshows.

27.      Sliderocket  - A easy to use site for creating visually engaging slideshows, recently purchased by ClearSlide.

28.      Slideroll  - A nice site/app to create slideshows and publish them on the web.

29.      Slideshare  - One of the most popular sites around for uploading and sharing presentations in a secure environment.

30.      SlideShark  - A nice iOS app for view and editing PPT on the iPhone or iPad.

31.      Slideshow Creator  - SSC on Google+ is probably one of the most popular way to create slideshows in a safe environment for students.

32.     [Smilebox](#)  - A very popular site for creating beautiful looking slideshows, collages, presentations and more.

33.     [Soo Meta](#)  - A wonderful site for &quot;flipping&quot; a classroom and creating excellent looking presentations that can be embedded into a blog or site.  Also, there are nice features such as: the ability to embed a poll into a presentation, track usages statistics, and more.

34.     [Speaker Deck](#)  - A great site for uploading a PDF then turning them into a slideshow that can be embedded into a site or blog.

35.     [Swipe](#)  - A new (private beta) site for creating beautiful looking slideshows that can be used on any device.

36.     [TotSplash](#)  - An innovative presentation and brainstorming tool for creating engaging presentations that can be embedded into a site/blog.

37.     [Vivapitch](#)  - A nice plugin for PPT and Android to engage audiences on mobile devices.

38.     [Vizlingo](#)  - A cool site for making a slideshow out of text.

39.     [Vuvox](#)  - A great site for creating stunning presentations and slideshows.

40.     [WebSlides](#)  - A neat way to turn Diigo bookmarks into interactive slideshows.
